Great Basin Climate Forum

May 3rd 2013
9am-4pm

A discussion of current climate conditions in the Great Basin

The California Nevada Applications Program (CNAP), Great Basin Landscape Conservation Cooperative (GBLCC), and the Western Regional Climate Center (WRCC) will be hosting the 4th Great Basin Climate Forum to summarize the current climate conditions in the Great Basin and discuss how those conditions affect resources in the Great Basin. This year’s forum topics will revolve around on-going drought conditions in the Great Basin with in-depth presentations. This meeting is intended for public and private land managers, resource professionals, Tribal members, and interested individuals who are involved in resource management in the Great Basin. Topics to be covered include:

- Nevada drought response and coordination efforts
- Fire behavior and climate in the Great Basin
- Overview of current climate and hydrology prospects
- Drought effects on horse and burro populations in Nevada

Presenters

Kelly Redmond, Regional Climatologist, Western Regional Climate Center
Mike Jenkins, Associate Professor, Quinney College of Natural Resources, Utah State
Alan B. Shepherd, Nevada Wild Horse and Burro Lead, BLM Nevada State Office
Nina Oakley, Assistant Climatologist, Western Regional Climate Center
